European Pneumo Update 2014

1st European
Update Congress
in Pneumology

Vienna,
20–21 June 2014

Scientific Board

Roland Buhl
(Germany)

Dear Colleagues,

following the remarkable success of the Pneumo Update in Germany over the last 10 years, we are pleased to open this event to a European audience. This is your chance to get updated in pneumology within two days. The most relevant clinical papers of the last year will be reviewed and put into perspective, and today's burning issues will be addressed, by leading experts in their fields.

The scientific committee has worked intensely to put together an exciting program. The speakers have been chosen from all over Europe and will bring their expertise and knowledge to this congress. All important fields of pneumology will be covered over two intense and exciting days. Both clinicians and practitioners will profit immensely from the lectures, which will improve their clinical and practical knowledge as well as the quality of their daily work. Moreover, you will also have the opportunity to interact with colleagues, exchanging experiences and information on current trends and future directions in pneumology.

Features of our congress include:

- Renowned experts in each field of pneumology will map out all major developments as published in international literature during the past year
- The entire field is covered by 14 one-hour-sessions so that participants will be fully updated within these two days
- Unbiased medical content in presentations
- Print compendia of the presentations are handed out to all participants at the start of the congress and eLearning resources complete the attractive range of Update materials
- High impact ePoster exhibitions with the facility to offer ePoster discussions/events

Finally, there is no doubt that Vienna is an extraordinary and wonderful place to visit in June. We look forward to seeing you there.
